I'm a **Senior Software Engineer** with 8 years of experience building SaaS products, mostly in PHP and TypeScript. Lately a lot of my work has been on our AI agent, including its tools, MCP and evals. I am happy working across the stack and across teams.

EMPLOYMENT HISTORY

Dec 2025 to Present, Senior Software Engineer | AskNicely

Work across the platform on integrations, infrastructure, incident triage and AI features

- Contribute to Ask NiceAI, our conversational analytics agent: agent tools, moving context into MCP, and model upgrades on Amazon Bedrock
- Made our LLM eval tests deterministic so they're reliable enough to run on every change
- Worked on the migration to our second generation AI themes engine
- Mentor engineers and give internal talks on applied AI

Feb 2022 to Dec 2025, Software Developer | AskNicely

- Led our Snowflake integration through multiple enterprise rollouts, working with customer technical teams
- Technical lead on Reputation Grader, working across Marketing, Product and an external developer
- Helped turn AI Insights from a hackathon prototype into a shipped feature
- Built AI content summarisation APIs using AWS Bedrock, Claude and ChatGPT
- Implemented multi factor authentication and improved bot detection
- Resolved customer issues on the engineering support desk rotation

Nov 2020 to Feb 2022, Automation Test Developer | inMusic

- Built integration test coverage for cross functional feature teams
- Created page objects wrapping QML components to speed up test writing
- Built real time test monitoring dashboards in Kibana using Vega

Nov 2018 to Sep 2020, Software Developer | Grappler

Joined as a Junior Developer, then delivered web projects independently

- Built a scheduling system and live monitoring for custom VMs on Google Compute Engine
- Built APIs and tools for searching exception and logging data
- Built feature logging and real time user session feeds

EDUCATION

University of Auckland | 2016 to 2019

Bachelor of Engineering (Honours) in Computer Systems Engineering
Second Class Honours, First Division

LANGUAGES

- PHP
- TypeScript
- JavaScript
- SQL
- Python
- Bash

FRAMEWORKS

- Symfony
- Laravel
- Vue.js
- React
- AngularJS

TOOLS & CLOUD

- AWS
- Amazon Bedrock
- Snowflake
- Docker
- Terraform
- Datadog
- GCP
- Git

AI & LLMS

- AI agents and tool design
- Model Context Protocol (MCP)
- LLM evaluation
- Prompt engineering
- Model API integration

CERTIFICATIONS

- AWS Certified Cloud Practitioner, 2024

PERSONAL INTERESTS

Improvisation, Singing, Videogames, Cooking, Skiing, Sailing.
